Re: Hamsa Environmental Solutions Pvt. Ltd.

Hamsa Environmental Solutions Pvt. Ltd. has built several modular, skid mounted chemical processing and recovery systems for PESCO and they have done an excellent job executing these projects for our company.

Hamsa has supplied to PESCO a complete system for mixed glycol distillation and recovery plant, and are currently handling another similar system for two PESCO clients. They are also building a Solvent Extraction System to clean up Used Lubricating Oil, which is another on-going project.

I would highly recommend this group to design and build this type of equipment for anyone, as they practice good craftsmanship in everything they do and stand behind their work. If you have any questions concerning this company or the owner and staff please contact me via my phone – 540 529 1588, or by email – luke@pescova.co .

Yours truly,

Luke Staengl, President & CEO
